

Building “safe-to-fail” simulation environments to develop workforce-ready skills: Simulation and Skills Development

Date: Monday, 11 August 2025

Time: 13:30 – 17:00

Location: City 1, Adelaide Convention Centre

This Master Class is perfect for:

- **Registered Training Organisations** specifically staff using simulated environments in their teaching and/or learning design
- **Employers** specifically learning designers, apprenticeship supervisors where training is taking place onsite
- **Educators** employed in such roles as learning designers, trainers, learning facilitators

The focus of this Master Class is on providing essential insights into creating "safe-to-fail" simulation environments that help develop workforce-ready skills. It is an educationally oriented program, provided by experts who have developed a Nationally recognised training qualification and are keen to share their knowledge about simulation in the VET Sector.

Why Attend:

If your training programs incorporate simulation for curriculum and assessment, this Master Class is a must! While simulation is a popular learning strategy, are you truly maximizing its potential? This session will provide educators and industry professionals with the knowledge and tools to:

- **Equivalence in Assessment:** Ensure that simulation-based assessments are on par with workplace-based assessments.
- **Employer Collaboration:** Work with employers to ensure simulations meet both workplace and industry standards.
- **Program Development:** Create simulation programs that maintain professional continuity and consistency.

Unlock the full potential of simulation in your training programs and prepare your workforce for real-world challenges!

Presenters:

This Master Class is developed and presented by the team from Cubic Australia
